## Sacred Animal Totems and Deities of the Original Zodiac

7-week and 6-week online courses

The mapping of the constellations and the understanding of the **Abosom** (Deities) governing these stellar shrines originated in **Khanit** (Nubia) and was preserved in **Kamit**. This was thousands of years prior to the Babylonian empire. The original sacred animal totems, **akyleneboa**, carrying the **tumi**, Divine power, of the **Abosom** (Deities) were corrupted in various ways by the greek invaders of **Kamit**. In this course we examine the original **Abosom** (Deities), their sacred animal totems and role in Creation and their physiological

shrines in the spiri-genetic bodies of **Afurakani/Afuraitkaitnit** (African~Black) people. There is no true astrology without a knowledge of the actual **Abosom** (Deities) animating the stellar shrines-constellations.
